

Air transport is **one of the fastest modes of public transport which connects international boundaries**. Air transport allows people from different countries to cross international boundaries and travel other countries for personal, business, medical, and tourism purposes.

The worldwide air transportation network is a **critical infrastructure with high impact on mobility, trade and economy**. Another examples are the air transport systems of a country or a country's own air transport company.

Fast Service.

Airways are the fastest and very expensive mode of transport today. **It is the only mode of transport to reach the most remote and distant areas especially where there are no roads and railways**. The important airports are Delhi.

There is less need for heavy packaging.

High Speed. Air is the type of freight capable of traveling long distances in short periods of time

GLOBAL AIR TRANSPORTATION NETWORK
